Smarter Hub

Stage 5: Evaluation

Made by:

49544, Nuno Morais
47592, Marta Carlos
47651, Leonardo Correia
47554, Jorge Alves

Lab class Nº P1

Professor:
Teresa Romão

November 29, 2018

Reception date: November 24

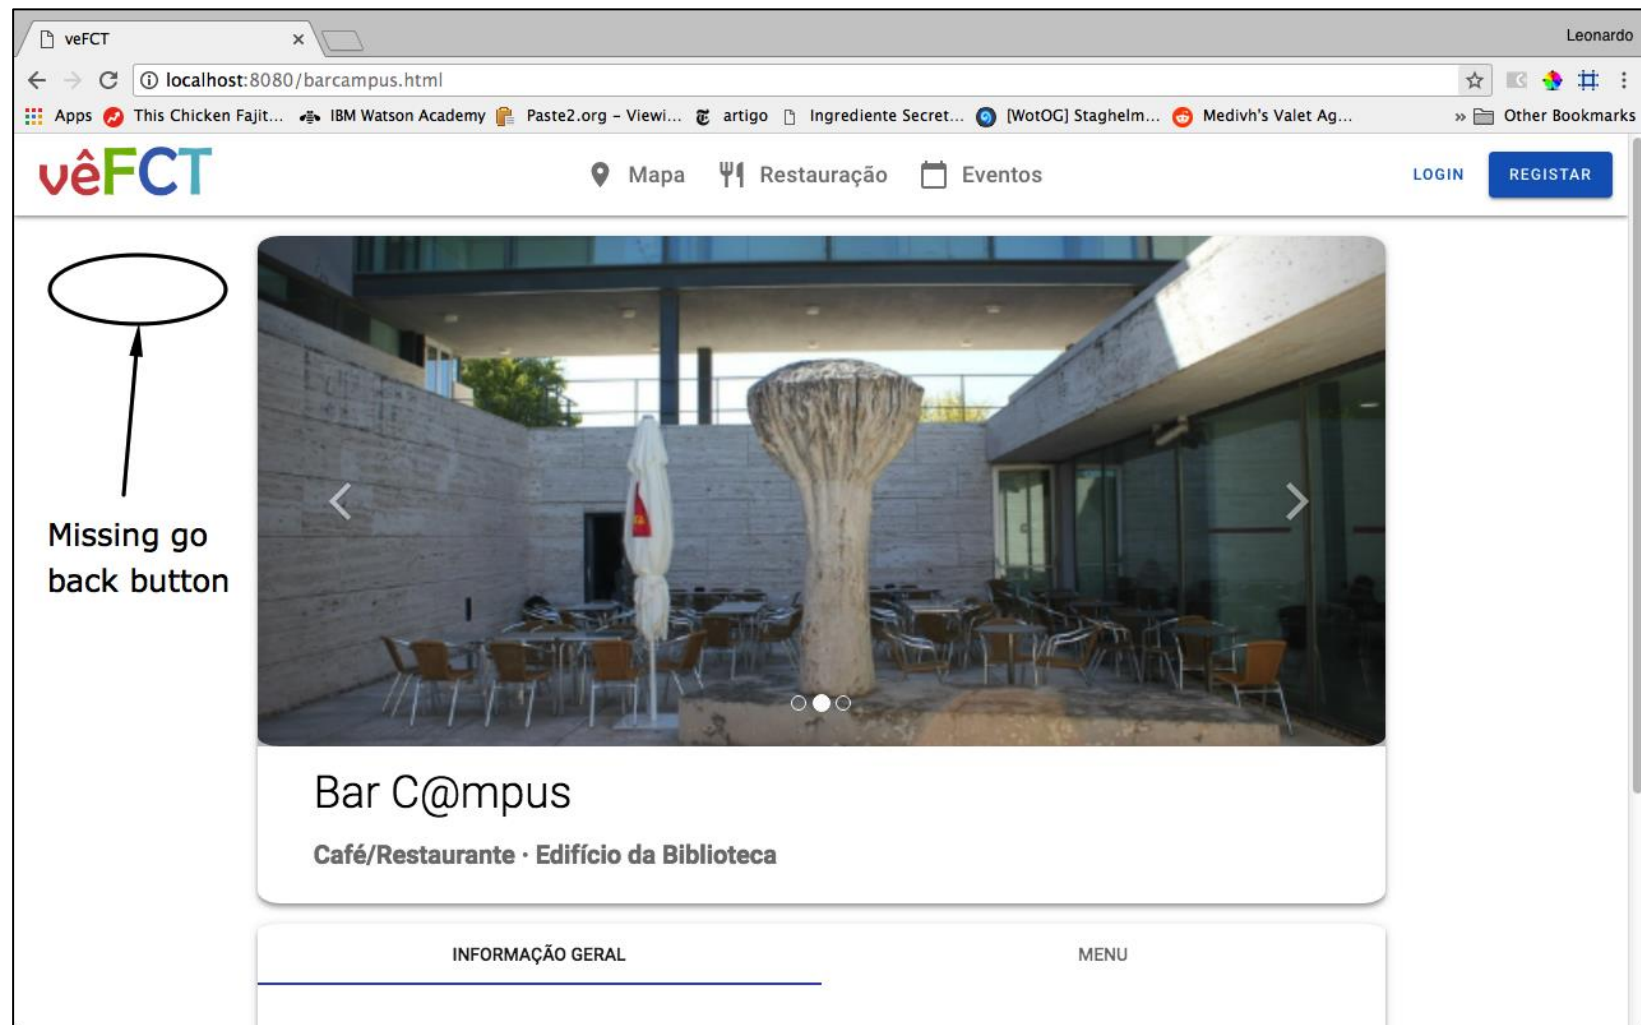

Delivery date: November 29

Heuristic Evaluation:

N.º	Problem	Heuristic	Description	Severity	Solution
1	Missing go back button	Efficiency of use	When you are in street view or you open a menu of an event or a restaurant you don't have a button to go back to the map or to all the events or restaurants respectively.	Minor	Add a go back button when you are in street view or when you are in a menu.
2	Not indicating selected building	Visibility	When you select a building info menu or when you click on a building on the map it should highlight the building.	Major	When selecting a building or a building menu, the building on the map should have a highlighted border.
3	Building's menus information not consistent	Consistency	The menus of the buildings don't have all the same information (ex: only "Edificio 2" has blueprint).	Minor	Menus should have all the same categories and mention that doesn't exist the info of that category when it's the case (ex: On blueprint category it says doesn't exist).
4	Map shouldn't have scroll	Visible navigation	Map doesn't need scroll.	Minor	Remove map's scroll.
5	Building menu's and blueprints should have scroll	Visible navigation	The blueprint on the menu is cut and when you open it it's also cut and you can't scroll down to see the rest.	Minor	Insert scroll on the menu and the blueprint view.
6	Option to open building's blueprint not clear	Discoverability	It's not obvious you can click on the blueprint on the menu.	Major	When you hover the blueprint it should give a message that makes clear it's clickable (ex: "expand").
